

The goal of the Maker Fest is to encourage students' passions, creativity, and problem solving. We hope to see many new and innovative creations and designs beyond our own imaginations therefore we will not provide guidelines that tell you what Maker Fest submissions should be. We do, however, have some restrictions for projects based upon school policies and student safety measures. They are as follows:

Maker submissions may not include:

- *Promotion for products illegal for use by minors*
- *Obscenities including profanity or references to prohibited conduct*
- *Slanderous or mean-spirited words or images*
- *Images or words that violate school rules or encourage the violation of school rules*
- *Weapons, dangerous objects, or look a-likes*

Participation in school activities is a privilege. Please understand the limitations for this project, and contact Ms. Gogel for clarification if you have any questions.

Thank you,
Ms. Gogel
